Amendments to the Specification

Please replace paragraph [0038] with the following amended paragraph:

[0038]   As detailed below, an exemplary application definition file may be formed using a mark-up language, like XML. In accordance with an embodiment of the present invention, defined XML entities are understood by the virtual machine software 24. Defined XML entities are detailed in Appendix "A," attached as FIGS. 20A-20LLL hereto (the AIRIX Markup Language (ARML) Specification), and Appendix "A" of U.S. Patent Publication No. 2003/0060896. ARML is an XML markup language used in the present embodiment. The defined XML entities are interpreted by the virtual machine software 24, and may be used as building blocks to present server-side applications at mobile device 10, as detailed herein.
